

## Jounce Therapeutics to Participate in the Upcoming Investor Conferences

September 7, 2022

CAMBRIDGE, Mass., Sept. 07, 2022 (GLOBE NEWSWIRE) -- Jounce Therapeutics, Inc. (NASDAQ: JNCE), a clinical-stage company focused on the discovery and development of novel cancer immunotherapies and predictive biomarkers, today announced that company management will participate in the following upcoming investor conferences in September:

- **H.C. Wainwright 24<sup>th</sup> Annual Global Investment Conference:** Fireside chat on Monday, September 12, 2022 at 10:00 a.m. ET in New York, NY.
- **Cantor Oncology, Hematology & HemeOnc Conference:** Panel titled, "Tackling the Tumor Microenvironment and Further Arming the Immune System" on Wednesday, September 28, 2022 at 2:35 p.m. ET in New York, NY.

A webcast of the presentations will be available by visiting "Events and Presentations" in the Investors and Media section of Jounce's website at [www.jouncetx.com](http://www.jouncetx.com). A replay of the webcasts will be archived for 30 days following the presentation.

### About Jounce Therapeutics

Jounce Therapeutics, Inc. is a clinical-stage immunotherapy company dedicated to transforming the treatment of cancer by developing therapies that enable the immune system to attack tumors and provide long-lasting benefits to patients through a biomarker-driven approach. Jounce currently has multiple development stage programs ongoing while simultaneously advancing additional early-stage assets from its robust discovery engine based on its Translational Science Platform. Jounce's highest priority program, JTX-8064, is a LILRB2 (ILT4) receptor antagonist shown to reprogram immune-suppressive tumor associated macrophages to an anti-tumor state in preclinical studies. JTX-8064 is being investigated alone and in combination with pimivalimab (formerly JTX-4014), Jounce's internal PD-1 inhibitor, in one monotherapy and seven indication-specific combination therapy cohorts in the Phase 1/2 INNATE trial and is currently enrolling patients with advanced solid tumors in the Phase 2 portion of the study. Jounce's most advanced product candidate, vopratelimab, is a monoclonal antibody that binds to and activates ICOS, and is currently being studied in the SELECT Phase 2 trial. Pimivalimab is a PD-1 inhibitor intended for combination use in the INNATE and SELECT trials and with Jounce's broader pipeline. Additionally, Jounce exclusively licensed worldwide rights to GS-1811 (formerly JTX-1811), a monoclonal antibody targeting CCR8 and designed to selectively deplete T regulatory cells in the tumor microenvironment, to Gilead Sciences, Inc.
